Installation
PC / Windows

1. Use 7zip to unpack the downloaded files. This program is free and is available from here : http://www.7-zip.org/download.html

2. Extract/unzip all the files from the downloaded archive to your desktop or a location of your choice. Open the unzipped folder.

3. Select either the 32Bit or 64Bit folder.

4. You will see the Afrokeyz.instruments folder and AfroPlugin.dll file.

5. Move both the (Afrokeyz.dll file and the Afrokeyz.instruments folder) in to your audio plug-ins folder. This is usually located here: C:\Program Files\Vstplugins (select yes if asked for an administrator's permission)

6. When your DAW starts up, it will rescan your plug-ins folder and detect Afro Keyz. In some instances you may need to manually rescan your DAW's plug-in folder.

MAC / OSX
VST Installation

1. Use UnRarX to unpack the downloaded files. This program is free and is available from here: http://www.unrarx.com/

2. You will see a file with a Afrokeyz.vst (Free Version) or the Mac Installer Afrokeyz. PKG (paid version) extension. This is the only file needed for Afro Keyz to run.

3. Move the Afro Keyz.vst file to the VST folder in your audio plug- ins folder (the default location is Macintosh HD/Library/Audio/Plug- Ins/VST).

4. When your DAW starts up, it will rescan your plug-ins folder and detect Afro Keyz.

MAC / OSX
Audio Units / AU Installation

1. Use UnRarX to unpack the downloaded files. This program is free and is available from here: http://www.unrarx.com/

2. You will see a file with a Afro Keyz.component (free version) or .pkg (paid version) extension. This is the only file needed for Afro Keyz to run.

3. Move the Afro Keyz.component file to the components folder in your audio plug-ins folder (the default location is Macintosh HD/Library/Audio/Plug-Ins/Components).

4. When your DAW starts up, it will rescan your plug-ins folder and detect Afro Keyz.

Troubleshooting

If you are having trouble with INSTALLING please read through the F.A.Q below or contact us :
contactafroplug@gmail.com

IT DOESN'T SHOW UP IN MY DAW INSTRUMENT LIST:

The Plugin needs to be installed in your usual plug-ins folder such as /program files/Vstplugins for PC MacintoshHD/Library/Audio/Plug-Ins/Components for MAC AU MacintoshHD/Library/Audio/Plug-Ins/VST for MAC VST

SHALL I USE THE 32bit OR 64bit VERSION :

If you are using a 64bit DAW please use the 64bit version of the Plugin.

If you have a 64bit Operating system but are using a 32bit DAW please use the 32bit version, on PC's this will be /program files (x86)/Vstplugins
