COMBAT LOOP DRUM MACHINE

manual

Drum samples & loops machine

COMBAT LOOP DRUM MACHINE

Thanks for downloading CLDM !

I hope you enjoy it and use it in your productions!

Combat Loop Drum Machine is a free sample and loop based drum instrument, originally crafted and edited by DCSI.

The samples and loops are splitted as follows:

Glitch kit (from C0 to B0)

Clean kit (from C1 to B1)

Power kit (from C2 to B2)

Combat Loops (from C3 to B4) - white keys only - optimised to be played at 80 bpm

Noise kit (from C5 to B5)

Drum sequences (from C6 to B6) - optimised to be played at 80 bpm

The instrument comes with velocity sensitivity.

Experiment building your own Combat Drum track!

Play the keys right away or program drum sequences through the use of your midi sequencer.

The interface is pretty intuitive but for simplifying purpose here's a short description of the 4 available parameters:

GAIN KNOB: to adjust the volume

PAN KNOB: to adjust the panorama.

RELEASE KNOB: to adjust the release of the samples and loops.

REVERB KNOB: to adjust the amount of reverb effect available in this instrument.

This instrument is a simplified version of the
COMBAT LOOP DRUM MACHINE Kontakt Instrument
available for free as well on the DCSI website.
