

24 octobre 2013

Hello

First, thank you for visiting the Quantum-Music website. We work hard every day to make your experience with us better, and we really mean it.

This plugin was coded by a team of Electrical Engineering bachelors from the École Polytechnique de Montréal, as their final school project in 2012. The final product still has some little quirks, but I've decided to release it anyway, so people can test it, and use it if they like it. Personally, I think the workflow could be improved, but the sound quality is great.

When I gave the project to these students, it was amazing to see how they were into it. The members of the team decided to call themselves the "Égal" team, which means "Equal" in french. The "success" criteria of the project were very demanding : I wanted the most transparent equalizer available. Please let me know what you think about it : [cdion@quantum-music.ca](mailto:cdion@quantum-music.ca), your opinion really matters to me.

To conclude, if there is enough demand for, I might give the project again to another class next year. So, feel free to let me know if you think that this plugin is relevant enough to pursue the lead.

Regards

A handwritten signature in grey ink, appearing to read 'Ch. A. Dion'.
