

**Stupider Simpler Sampler** from BipTunia Synths is by FAR the easiest to use sampler there is. It's *stupid* simple to use.

It's a 64-bit VST, drop-dead simple, and a heck of a lot of fun. It brings musical purity back to using samplers. Integrity. No distractions. No fancy fluffing. *The real deal* of sampling as the ancients practiced it, except in software, not hardware.

It's even easier to use and simpler than our simple sample VST, **Stupid Simple Sampler**, which is like **Stupider Simpler Sampler**, except **Stupid Simple Sampler** has ADSR controls. ([Get that here](#) free if you want to wimp out and have ADSR controls.)

**Stupider Simpler Sampler** can handle any WAV sample, mono or stereo, any bit depth or sample rate.

It has ZERO controls, just the green square button that you press to chose your own sample.

It's an old-school style sampler, like back when things were not complicated. It's inspired by the tape samplers used by Pink Floyd in the 60s, and the hardware samplers used in rap in the early 80s.

**Stupid Simple Sampler** comes with 16 samples as presets. But you can add any samples you want, in the sub-folder at:

**\\StupiderSimplerSampler\\samples**

You can change the color of the green sample picker button to anything you want, as long as you put it in the **\\StupiderSimplerSampler\\**

folder, and it must be a 75x75 PNG file, with the file name of

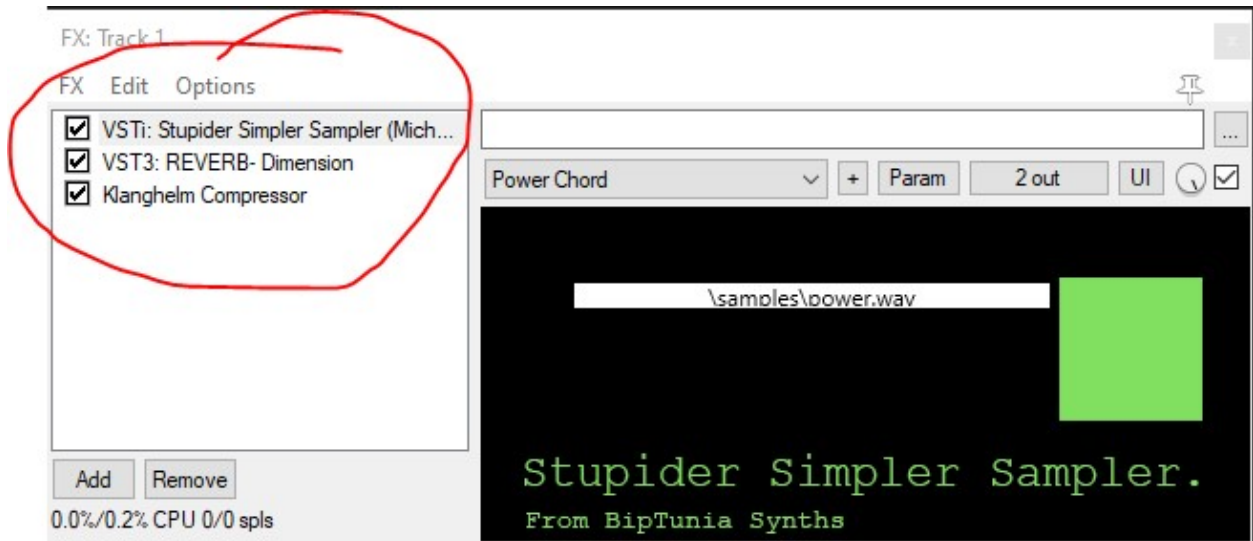

**default\_\_browse.png**

(note there are two underscore in the middle, not one). I've included a red one and a white one in the folder for you. Just save the green one, then change the file name of the red or green one to

**default\_\_browse.png**

Stupider Simpler Sampler uses very little memory. I've effortlessly run a project with 39 instances of Stupider Simpler Sampler.

**FOR BEST SOUND**, add a little bit of reverb, and a dash of light, fast, compression after this VST on the same channel:

[This free compression VST](#) works great for this, without changing any settings from the default.

The 16 included samples in **Stupid Simple Sampler** are:

- Bass
- Bell
- Bounce
- Clink
- Drone
- Floaty synth
- Funky guitar
- Cat meowing
- Moar cowbell
- Power chord
- Stick hit
- Strings
- Sustain
- Sine tone
- Tubular Bell
- Worms
