Here a new Plugin from easytoolz.de:
easy muug XT V3.7 Demo
an „Emulation" of the first Synthesizerlegend

Description:

An „Emulation" of the first Commercial Synth from 1970

- 3 Oscilators with 6 Waveforms (Triangle, Saw, Saw/Triangle and 3 different Pulses)
- Tuning over 5 Octaves (2´-4´-8´-16´-32´) and Lo (Sub-audio) – Finetune
- Mixersection (Osc 1-3, Noise and Externel (Overdrive)
- Special Low-Pass-Filter with Cutoff, Emphasis and ADS Envelope
- 2 ADS-Envelopes (one for Filter – one for VCA-Amplifier) with Release-button
- OSC 3 as Modulator > (Osc 1+2-Mod) and > Filter Cutoff – Keyrange-mod (Cutoff)
- Glide – Legato on/off – Mod-Mix (Osc3-Noise) - Volume
- Additonal to the Original-Features:
- Velocity – Mono/Poly (max 12 Voices) - Reverb – Delay with Pan-LFO´s
- Unison-Function with Detune - LFO with :5 waves modulate-> - Cutoff,
- Emphasis,Pitch,Pulse-width1-2, Phase-mod 1-3 and Unison-Detune
- All Modulations are routed to the ModWheel !! (Midi-CC 14)
- 2 additional Ramp Generators with several Targets
- Midi-Learn-function (all Midi-CC are shown in Mouse-Hints in brackets !)

essential-audio-systems

Because the previous demo version was ripped off, unfortunately, I had to limit the actual demo stronger.
Now, except a rushing all minute, only few regulators are active:
(only Osc 1, Filter and Volume)
But the demo is fully functionable.
I hope you can understand this....SORRY for this...

The Picture above shows the FX-Section with the 2 Ramp-generators -
Delay-Section with Pan-LFO and Reverb – Mouse-click at the button „FX"

It offers a nice Collection of Vintage-Subtractive-Synth-Sounds,
with an easy to use interface ...
...just do it...

The additional Patches are made by Kujashi aka Schiffbauer – Many Thanks !!!
Some Modules are from David Haupt - and EVM aka Etric Van Mayer,the Keyboard-Elements are from Art Vera Music.com , the Knobs are based on Prefabs from Hlis93
easy-muug is produced with the fascinating SynthEdit from Jeff McClintock
Many thanks for Your work !!
